PROJECTS

Botanika - Flower Boutique Video Game
Front End Designer

As a gardener and florist of your grandmother's flower shop, you're given the responsibility to tend and arrange the flowers, based on the customer's preference..

Meal To Live - Social Media Charity Android App
Front End Designer, Back End Designer

A social media that connects donors, volunteers and charitable organizations. It allows charitable organizations to post and share events that the donors and volunteers can donate or participate.

Road Design Traffic Simulator
Programmer

Using C++ console, it simulates road design in Makati City, with variables such as number of lanes in the road and number of cars.

FILUSH - "Find Your Nearest Bathroom" Android App
Project Manager, Front End Designer, Back End Designer

A crowdsourcing app that allows user to mark, rate and comment nearby bathrooms. This allows users to find their nearest bathroom to take relief.
